

Make your own little book

You can make your very own little book out of one sheet of paper! First, follow the folding instructions below. Then, scribble and doodle, write and create your own stories, poems, plays and more! Or, why not record what you see, hear or dream that inspires you.

Step 1-4: Fold the paper into 8 even parts.

Step 5: Fold the paper in half again, like you did in step 2.

Step 6: Cut over the fold you made earlier - stop when you get to the next fold, so only cut the folded paper halfway!

Step 7: Open up the paper and fold it into half again like you did in step 1.

Step 8: Push the two folded edges towards each other so that the gap opens up.

Step 9: Flatten the booklet.

Step 10: Fold the booklet in half so that the cover is on the front page.
