

## How to make an origami starbook

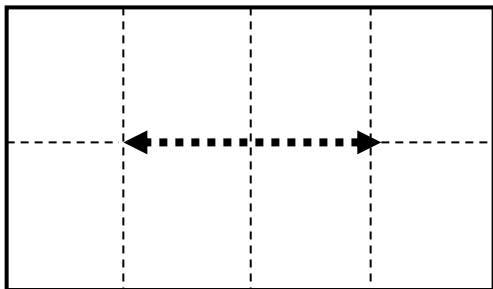

1/ Fold a sheet of A4 paper in half one way – and in half the other.

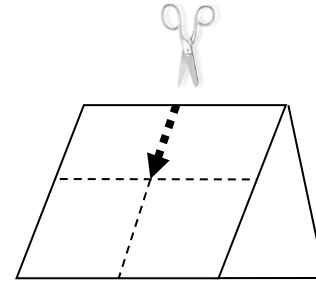

2/ Fold both the short edges to the middle. When laid out flat again, these folds give you eight equal boxes. These are the pages of your starbook.

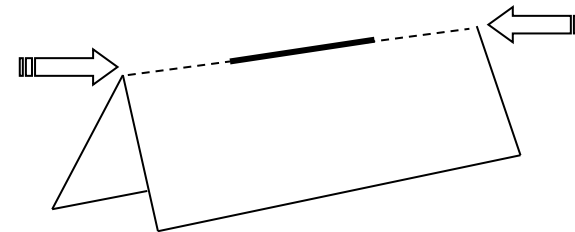

3/ Cut along this line.

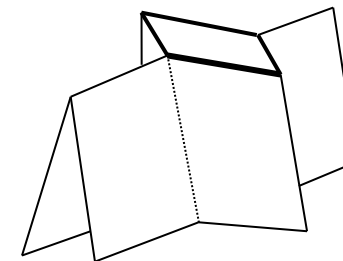

(It's easier if you fold along the shortest fold in the middle, then cut).

4/ Fold the paper again. This time along the longest middle fold.

5/ Push both ends in until the cut opens up. Looking at it from above, it makes a star shape.

6/ fold it flat to make a book. Use two of the eight pages as a front and back cover, or attach (with needle & thread or staples) a card cover (with a tiny fold to make a spine).
