

# Christmas tree

Many people decorate their homes with Christmas trees. Decorate your paper with one, and your star will shine bright!

1

Draw a triangle with rounded sides. Add curved lines inside the triangle. Then draw a small trunk at the bottom.

2

Draw a star at the top of the tree. Then draw a diagonal line from the left side of the top curved line to the edge of the one below it. Repeat adding diagonal lines down the tree on both sides. These lines will give the tree layers.

3

Draw scalloped lines just above each curved line. Trace over the outside lines of the star. Then rub out the middle lines of the star.

4

Add short double lines to connect the star to the tree. Draw curved lines down the tree to look like ribbon. Add circles in different sizes for ornaments.
